

# Archer Evolv

Today, your organization needs to be nimble, and so do your risk and compliance solutions. Many organizations struggle with the cost, complexity, and resources needed to support the deployment and ongoing maintenance of on-premises applications and platforms for risk and compliance management. This applies to both large companies with IT departments looking to become more agile as well as smaller organizations that may lack the infrastructure and resources to manage and maintain on-premises platforms.

## The Solution – Archer Evolv

Archer Evolv™ is an innovative SaaS offering that brings together transformative enhancements and AI capabilities to help your organization comprehensively and proactively manage compliance and risk.

## World-Class SaaS

Archer Evolv delivers a highly flexible and scalable solution, with a modern, modular user interface, backed by a suite of open, discoverable APIs. It adapts to any business hierarchy or process needs, and is based on best-in-class industry practices in governance, risk, compliance, resilience and assurance.

Archer Evolv is easy to integrate and mobile, enabling your organization to address emerging challenges and quickly deploy the capabilities you need. With features and functionality that exceed on-premises deployments, your organization can leverage the power and scalability of subscription-based software to address your global business risk and compliance challenges. Archer Evolv is scalable, resilient and agile, incorporating updates and new features, providing the best performance with reliability and speed and offering:

- Rapid cadence of innovation, improvement, and updates to the Archer Platform.
- Fast and easy setup to get started quickly and minimize disruption.
- Scalability on demand to add capacity and capabilities as your organization's needs evolve.
- Reduced IT burden, eliminating the need for internal software and server maintenance.
- Immediate access to the latest upgrades and functionality.
- Focus of risk management resources on expanding and maturing your risk management programs.

“The rapid development of GenAI presents opportunities and risks, requiring CROs and their teams to reevaluate and update existing risk models and strategies.”<sup>1</sup>

---

## Deep Learning Artificial Intelligence

Today's complex environment makes managing risks effectively and keeping up with new and evolving regulations challenging, leaving organizations vulnerable to non-compliance and operational inefficiencies. Archer Evolv incorporates deep learning AI capabilities that provide guidance, and insights throughout your risk management journey.

Archer Evolv uses AI technology to enable a proactive and integrated approach to risk management. It enables you to manage and mitigate risk and monitor and ensure compliance. With Archer's AI-powered offerings, you can effectively manage and prioritize risk and ensure compliance, reducing losses and saving money.

## Next Generation Risk Experience

Organizations expect rich digital experiences. Risk management should be no different. Archer's next generation risk experience makes risk management easier, using familiar technology and approaches you see every day. Archer's user-friendly interface simplifies complex processes. Automated workflows help you build consistency and engage with your business operations. Archer is accessible by anyone anytime, anywhere on any device for a responsive and seamless user experience. Archer is intuitive and easy to adopt with minimal effort and integrates easily with other systems, reducing siloes and providing you with a richer set of data across your GRC program.

## Archer Evolv for Compliance

Archer Evolv for Compliance delivers a programmatic approach to deploy integrated processes that connect incoming regulatory intelligence to control implementations policies and actions incorporating core risk assessment and audit capabilities. It enables organizations to handle regulatory complexity with AI-driven tools that streamline processes, prioritize crucial actions, and align compliance efforts with business objectives. Its cloud-native platform combines cutting-edge technology with intuitive design to deliver a proactive risk and compliance approach, helping organizations stay comfortably ahead of regulatory and operational challenges.

Archer Evolv for Compliance introduces a comprehensive suite of features tailored to address modern compliance challenges, including AI-powered workflows, automated horizon scanning, and a centralized library of regulatory and non-regulatory obligations. These capabilities provide unmatched clarity into global requirements while enabling organizations to adapt quickly to regulatory changes. By identifying regulatory gaps and conflicts through AI-driven analytics, Archer Evolv for Compliance streamlines compliance management and minimizes the risk and costs of non-compliance.

## Archer Evolv for Risk

Archer Evolv for Risk, to be introduced later this year, will combine AI, best practices and human expertise, empowering organizations to approach risk management more proactively and strategically. By focusing on anticipation, optimization, and actionable insights, Archer Evolv for Risk will enhance risk resilience and reduce the total cost of risk. Performance, operational, financial, and strategic key performance and risk indicators will offer measurable benchmarks for evaluating effectiveness.
