

Archer ESG Disclosure Management

Businesses have increasingly prioritized Environmental, Social, and Governance (ESG) reporting to measure their commitment to sustainability and responsible corporate practices. Many companies are now aware of the importance of measuring and managing ESG performance to reduce risks and seek out opportunities for growth.

The Challenge

As ESG reporting regulations grow, organizations face increasing pressure to deliver clear, reliable, and comprehensive ESG reporting. They must effectively communicate results to stakeholders while keeping up with evolving reporting requirements across global jurisdictions.

The shift from voluntary to mandatory reporting has added complexity, driving companies to pursue more streamlined and automated sustainability reporting processes. Success now depends on both operational efficiency and the ability to use data across multiple reporting frameworks with flexibility and precision.

Furthermore, ensuring the integrity and reliability of information is vital. Companies need to deliver investor-grade data in an auditable format. Meeting these demands presents a formidable challenge that requires an innovative and efficient ESG disclosure solution.

The Archer ESG Solution

The Archer ESG Disclosure Management use case is a comprehensive solution addressing the growing demand for transparency in ESG reporting. Serving small businesses and large corporations, providing a complete solution that aligns with leading voluntary and regulatory frameworks.

By leveraging Archer ESG Disclosure Management, companies can streamline the process of collecting, structuring, and generating reports in alignment with key sustainability frameworks. This includes adhering to the Task Force on Climate-related Financial Disclosures (TCFD) recommendations and the Global Reporting Initiative (GRI) 2 General Disclosures.

In addition to these voluntary frameworks, Archer ESG Disclosure Management now offers a cutting-edge capability tailored to comply with regulations such as the EU Corporate Sustainability Reporting Directive (CSRD) and International Financial Reporting Standards (IFRS) S1 and S2. This innovative set of capabilities empowers companies to efficiently gather all requisite disclosure points, organize them systematically, and produce comprehensive reports, ensuring compliance and enhancing transparency in their ESG disclosures.

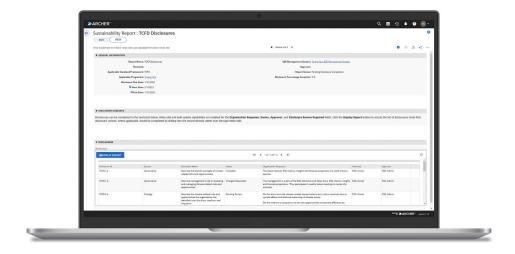

Lastly, companies can tap into the Archer integrated risk management (IRM) suite to apply a holistic approach toward their ESG disclosures. By implementing Archer ESG Management solutions with a broader Archer IRM program, business leaders can establish and test proper controls for disclosures, manage identified issues, and draw insights and tools needed to protect the business while adhering to their ESG policies.

Features

- Collect and aggregate data based on TCFD and leverage the content index template to produce a final report
- Gather information and report on GRI 2 General Disclosures
- Capture and report disclosures for CSRD ESRS, using a prebuilt intuitive workflows
