

Archer ESG Management

Implementing a scalable approach to
ESG with Archer

As businesses target attaining sustainable growth, there is an increasing demand for social and environmental responsibility. Meeting these standards can go a long way towards managing risks, improving corporate reputation, and promoting long-term stability. Environmental, Social, and Governance (ESG) compliance is key to achieving these goals.

Building an effective ESG program is not without its challenges. The spectrum of data organizations must gather, analyze, and disclose is growing exponentially. There are a myriad of regulations and ESG frameworks being introduced that vary by region, country, and continent.

With Archer, your ESG efforts can transform into a strategic advantage for your organization.

Automate Data Collection: Eliminate manual processes to ensure accurate and reliable ESG data.

Reporting: Reporting and dashboards aligned to industry frameworks support disclosure requirements.

Carbon Emissions Tracking: Calculate your carbon footprint across your entire enterprise and supply chain.

Materiality: Quickly assess, calculate, and report on double materiality impacts with pre-configured assessments based on the E.U. ESRS framework.

Integrated with Enterprise Risk Platform: Centralize ESG data and leverage broader risk management capabilities in the Archer IRM platform.

Archer ESG Management simplifies collection and reporting of ESG data, reduces ESG-related risks, and aligns your ESG goals with your business objectives.
