

## IT & Security Risk Management

Managing risk across your IT infrastructure with Archer

## Your organization runs on technology.

As organizations increasingly rely on IT systems, data and infrastructure, the complexity and scale of IT and security risk multiplies. IT and security teams are already challenged with an increasing volume of data created by a myriad of systems and layers of defense. Further complicated by the crushing mountain of business data they must protect, security and IT teams struggle to have a clear understanding of which data, systems and processes are most important to the business and which risks and gaps to focus on.

With Archer, your IT risk management and security efforts can transform into a strategic advantage for your organization.

**Proactive decision-making:** By organizing your processes to identify and mitigate the most impactful risks, and mitigate issues, IT can focus on more strategic decisions.

**Reduced costs:** Creating a repeatable, manageable process reduces the amount of effort required.

**Agility within the organization:** Implementing IT security and risk best practices allows your technology to keep pace with business needs.

**Improved performance:** Improving IT security and risk management results in better organizational performance today and growth tomorrow.

Archer can help you build a sustainable program that addresses the complexity of your IT risk and fits into your broader risk management strategy.

# How does Archer help you?

Archer IT & Security Risk Management automates and streamlines oversight of technology risk.

**Enable collaboration** between teams to ensure communication and data sharing.

**Improve visibility into risks** that could disrupt your operations.

**Reduce data overload** by normalizing and consolidating data from IT and security tools.

**Drive efficiency** for everyone involved with streamlined workflows and processes.

Accelerate your strategy with built in best practices.

## Purpose Built for IT and Security Risk Management

Archer IT & Security Risk Management enables you to establish clear IT risk management best practices that give you the confidence needed to effectively reduce technology risk.

#### **ENGAGE YOUR ORGANIZATION**

Archer is designed to help bridge the gap between your security operations teams and IT and the business and allow security managers to stay on top of the most pressing issues.

Archer helps IT and security teams consolidate data by integrations with many tools – relieving the stress of trying to navigate multiple data stores.

#### **INFORM YOUR STAKEHOLDERS**

Real-time dashboards and reports provide a better understanding of IT and security risks, insight into potential areas of concern and a level of confidence that you are managing risk within your established thresholds.

**Experience matters when it comes to managing risk.** Over the past 20 years, Archer has built a reputation of leading the industry - delivering solutions to emerging challenges while helping our clients build a strong, sustainable integrated approach to risk management.

Archer IT & Security Risk Management can be the backbone of your strategy to manage technology risk - whether it is supporting major digital business initiatives, enabling your security teams or facilitating IT compliance.
