ARCHER

Archer® Crisis Management
Use Case for Business Resiliency

The Challenge

Crisis management teams must work quickly and efficiently to und erstand and assess crisis events, protect the organization, and react in a measured and appropriate way to bring the disruption to a close. In many organizations, crisis teams are not looped in by incident response teams early in the life of the e vent, impacting their ability to reduce the effects of a crisis on the organization.

Overview

Archer® Crisis Management provides a coordinated, consistent and automated approach to handling crisis events. By aligning crisis management with incident response, you can respond earlier to incidents and in crisis situations t o protect ongoing operations. With Archer Crisis Management, you can manage crisis teams, communications, and plans while easily working with business continuity and IT disaster recovery teams to activate recovery plans when needed.
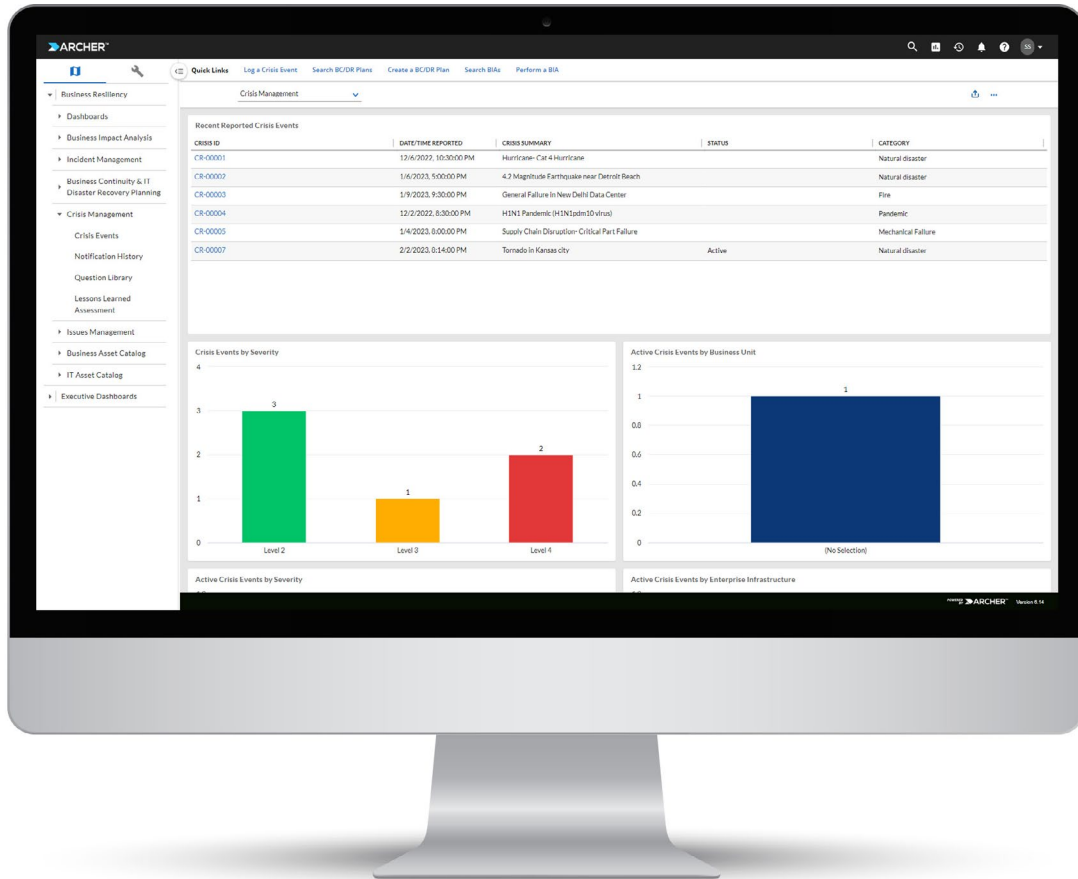

Features

- Workflow and notifications to provide a handoff between incident response and crisis teams for escalating events.

- Workflow, notifications and reporting for managing crisis events.

- Automated workflow to activate BC/DR plans during a crisis.

- Centralized contact and notification libraries to communicate during a crisis event.

- A lessons-learned assessment helps crisis teams evaluate where they can improve before the next event.

Benefits

With Archer Crisis Management, you can:

- Report and manage crisis events and send emergency notifications to communicate crisis information to appropriate personnel.

- Activate BC/DR plans to recover disrupted business operations, facilities or IT infrastructure.

- Reduce the impacts of incidents before they turn into crisis events.

- Evaluate lessons learned for incorporation in future plans.

About Archer

Archer is a leading provider of integrated risk management (IRM) solutions that enable customers to improve strategic decision-making and operational resilience with a modern technology platform that supports qualitative and quantitative analysis driven by both business and IT impacts. As true pioneers in GRC software, Archer remains solely dedicated to helping customers manage risk and compliance domains, from traditional operational risk to emerging issues such as ESG.
